

Recreate Common Rafter/Floor Beam System Rafter+FF

Recreate Common Rafter/Floor Beam System

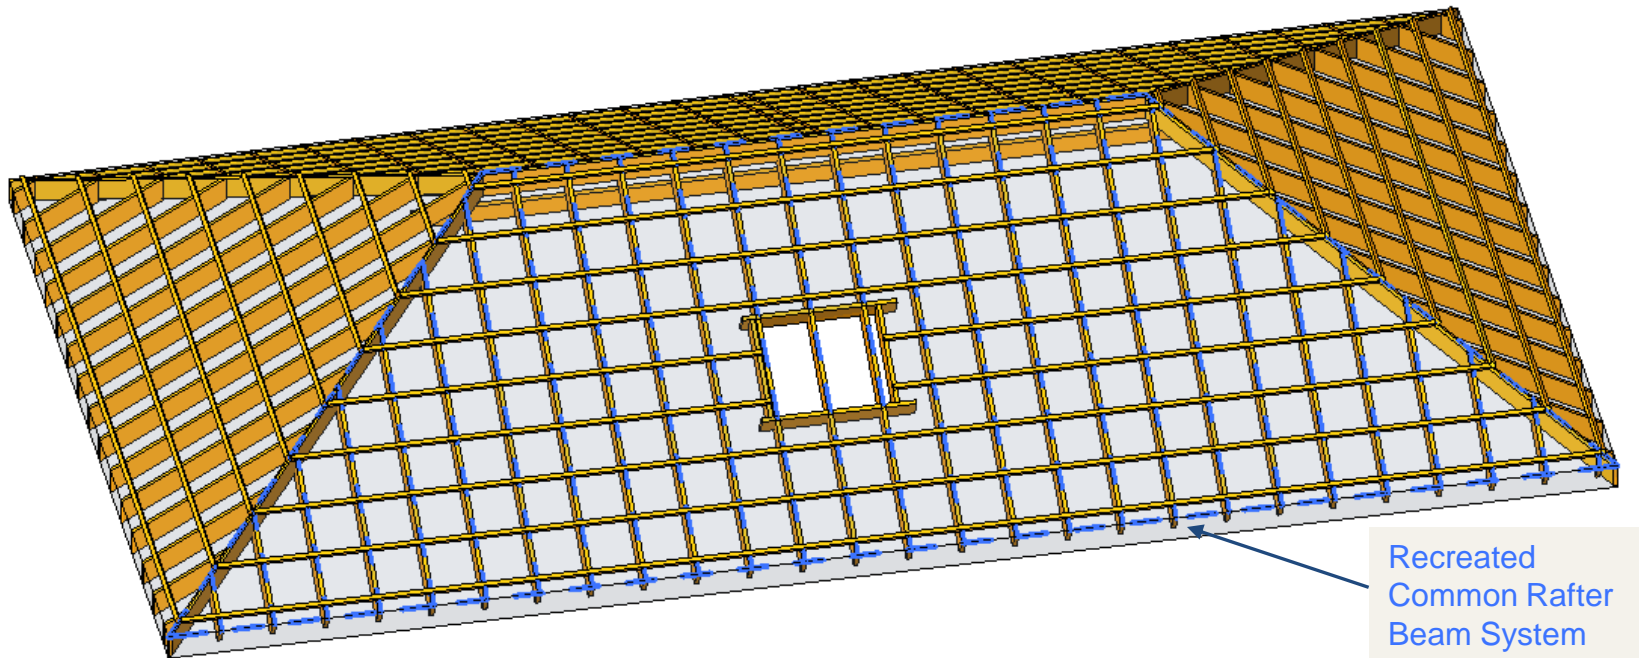

- After you split a beam system and you realize that it is splitted in wrong way there is no function in Revit to recreate it. It means that you have to delete all common rafter systems and create them from the beginning or you can use Rafter+FF function to recreate beam system.
- Select any beam system you want to recreate and run the function *Recreate Common Rafter/Floor Beam System* from the menu.

Selected beam system

Recreate Common Rafter/Floor Beam System

- As you can see the common rafter beam system is recreated. The cuts in the connections and ends are not updated and there is no opening. The needed functions for this slope you have to run again.

Increase your productivity !
