

Cut Opening

Cut Opening - extension for managing the creation of openings using Revit® „Interference Check“ results. Extension works with Ducts, Pipes, Cable Trays and Conduits.

Cut Opening features:

- takes Revit® „Interference Check“ results and displays in separate dialog for managing;
- creates openings where ducts, pipes, cable trays or conduits are crossing walls, floors or ceilings;
- adds opening offset if needed;
- has possibility to change the type of opening and to lock the cut offset;
- has possibility to change/delete existing openings if needed.

Cut Opening supports metric and imperial unit systems.
Language: English.
